Self-hosted. Your data stays on your server.

Sharing

Share your calendar with a key. The other person keeps their own account and sees your events on top of theirs.

1. Make a share key

Give it to one person. It works once.

They can: See my events

Key expires: In 24 hours

Hidden events show as: "Busy" | Nothing

Which types they see in full

- [ ] Work
- [x] Exam
- [x] Event
- [x] Hobby
- [x] Dating
- [x] Time blocks

Unticked types still block time as "Busy", so you can see when each other is free.

Make key

`LT-7QK4-M2XD-9HPA` Shown once · expires 7 Nov, 10:30 Copy

2. Add someone's calendar

Paste their key, e.g. LT-XXXX-XXXX-XXXX

Connect

Both people do this once with each other's key to see each other.
